

Dramatically Increase Accuracy & Speed of Image Analysis...

SOFTGENETICS®

JelMarker™
Gel Imaging and Conversion Software

With JelMarker™ an advanced gel imaging and file conversion tool!

Convert this...

JelMarker from SoftGenetics performs rapid and accurate analysis of gel images using novel sizing algorithms in a "biologist friendly" user interface. The program can import up to two TIFF, JPEG and TXT files for simultaneous analysis or convert the image into standard chromatographic format for analysis in our GeneMarker® fragment analysis program. Once in GeneMarker, you can quickly perform peak-by-peak comparisons and apply advanced clustering algorithms to your newly created trace files.

Free Trial Available!

Download a trial today to experience the ease-of-use and power of JelMarker & GeneMarker on your own data.
